

Microsoft Windows Consulting

Atomic Fission has extensive experience with Windows 200x systems both in standalone Internet environments as well as in internal LAN Active Directory deployments. Atomic Fission can assist with securing your IIS Internet infrastructure, building a rock-solid Exchange mail server configuration, or perhaps lend consultation pertaining to AD scalability and FSMO role planning. Atomic Fission is also well versed in UNIX/NT integration through the use of applications such as MIT Kerberos, Samba, and OpenLDAP.
